Claremont, Calif.

Dear Sir:

Mrs. Britton has sent me your letter with reference to mosses from southern California and will send the specimens which I shall be glad to look over and report upon. I should be interested in the Baker specimens and

PMC-005

particularly so in what you may collect while in the field. I have already run upon some problems in your part of the country, and I think there is a good deal that may be cleared up there by careful collecting

Very truly yours,

A. L. Ky Andrews.
